

IDFC GOVERNMENT SECURITIES FUND - CONSTANT MATURITY PLAN

(Previously known as IDFC Government Securities Fund Short Term Plan)
An open ended debt scheme investing in government securities having a constant maturity of 10 years

The fund is a mix of government bonds, state development loans (SDLs), treasury bills and/or cash management bills. The fund will predominantly have an average maturity of 10 years.

OUTLOOK

In its October policy, the monetary policy committee (MPC) voted to cut repo rate by 25 bps to 5.15%. The decision to cut was unanimous although one member wanted a larger 40 bps cut. This is largely in line with market expectations, although lately views of a larger 40 bps cut were also beginning to gain ground.

RBI continues to re-emphasize the important break that the Governor Das RBI has executed from the past: the full deployment of all three pillars of rates, liquidity and guidance. The guidance is the strongest yet with the MPC deciding to continue with an accommodative stance as long as it is necessary to revive growth, while ensuring that inflation remains within the target. Governor Das re-emphasized this in his press conference as well saying that as long as growth momentum remains as it is and till growth revives, RBI will be in accommodative mode. Thus while we may be closer now to the terminal rate in this cycle, investors need to focus on the other more important aspect: that barring an unforeseen global development it is very likely that the policy rate remains around the 5% mark for an extended period of time. The same interpretation will likely hold for the stance around ensuring abundant positive liquidity as well. This will mean that front end rates remain very well anchored. Investors may need to shift focus from looking at only potential mark-to-market gains from falling rates to looking towards 'receiving' the steepness in the curve built into the front end versus the immediate overnight and money market rates. The relative stability that one foresees in policy rates and liquidity should also translate into stability (with easing bias) in quality front end rates. We remain cautious on credit where valuations are still not being backed by narrative.

Fund Features:

Category: Gilt Fund with 10 year constant duration

Monthly Avg AUM: ₹121.30 Crores

Inception Date: 9th March 2002

Fund Manager: Mr. Harshal Joshi (w.e.f. 15th May 2017)

Standard Deviation (Annualized): 4.99%

Modified duration: 7.11 years

Average Maturity: 10.55 years

Yield to Maturity: 7.05%

Benchmark: CRISIL 10 year Gilt Index (w.e.f. 28th May 2018)

Minimum Investment Amount: ₹5,000/- and any amount thereafter

Exit Load: Nil

Options Available: Growth, Dividend - Weekly, Monthly, Quarterly & Periodic

Maturity Bucket:
