

IDFC DYNAMIC BOND FUND

An open ended dynamic debt scheme investing across duration

The fund is positioned in the dynamic bond fund category to take exposure across the curve depending upon the fund manager's underlying interest rate view where we employ the majority of the portfolio. It is a wide structure and conceptually can go anywhere on the curve.

OUTLOOK

The 3 clear themes for the bond market continue:

1) Focus has to be on best quality AAA and sovereign / quasi sovereign. There is no macro logic whatsoever for pursuing high yield strategies. The inherent illiquidity in that segment has now been amplified while many balance sheets will possibly continue to see steady deterioration.

2) The best risk versus reward continues to be in the front end (upto 5 year) in our view.

3) While duration is attractive given the wider term spread and when compared to nominal growth rate expectations, sustained performance here is still dependent upon the unveiling of a credible financing plan from the RBI for the enhanced borrowing program of the sovereign.
