

IDFC BOND FUND - Short Term Plan

(Previously known as IDFC Super Saver Income Fund - Short Term Plan)

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year and 3 years.

A Short Term Income Fund, the portfolio is mostly a mix of short duration debt and money market instruments. The average portfolio maturity will not ordinarily exceed around 2 years.

OUTLOOK

The 3 clear themes for the bond market continue:

- 1) Focus has to be on best quality AAA and sovereign / quasi sovereign. There is no macro logic whatsoever for pursuing high yield strategies. The inherent illiquidity in that segment has now been amplified while many balance sheets will possibly continue to see steady deterioration.
- 2) In our view, the best risk versus reward continues to be in the front end (upto 5 year).
- 3) While duration is attractive given the wider term spread and when compared to nominal growth rate expectations, sustained performance here is still dependent upon the unveiling of a credible financing plan from the RBI for the enhanced borrowing program of the sovereign.

Given the sizeable borrowing requirement ahead, the RBI may have to turn more proactive both on intervention and incentivization (time bound held to maturity ceiling hike for instance).
