

IDFC BOND FUND - Income Plan

(previously known as IDFC Super Saver Income Fund - Investment Plan)
An open ended medium term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 4 years and 7 years

An actively managed bond fund (with Macaulay duration between 4 to 7 years) which seeks to invest in highly rated money market and debt instruments (including government securities) and aims to generate stable long term returns through mix of accrual income and capital appreciation.

OUTLOOK

- Our base case would remain that eventually RBI's intensity of intervention will need to get dialed back over a period of time and hence we would continue to budget for an orderly rise in yields over time.
- However, this by itself provides for reasonable opportunities given the current steepness of the curve even at intermediate duration points (3 - 6 years).
- Put another way so long as the RBI is broadly committed to containing volatility and muting the impact of excess bond supply, the steepness of the curve provides for enough cushion even if one has to give some of this away as mark-to-market losses.
- However, one has to be careful not to extend duration so much that potential mark-to-market losses start overwhelming the excess carry made.

Fund Features: (Data as on 31st May'21)

Category: Medium to Long Duration

Monthly Avg AUM: ₹691.79 Crores

Inception Date: 14th July 2000

Fund Manager: Mr. Suyash Choudhary (w.e.f. 15/10/2010)

Standard Deviation (Annualized): 4.32%

Modified Duration: 4.26 years

Average Maturity: 5.11 years
