

IDFC INFRASTRUCTURE FUND

An open ended equity scheme investing in Infrastructure sector

A dedicated Infrastructure fund, that invests across the infrastructure value chain with exclusions like Banking, Autos, IT, Pharma and FMCG. It is a diversified portfolio of companies that are participating in and benefitting from the Indian Infrastructure and Infrastructure related activities.

OUTLOOK

Three key drivers of Equity markets are 1) Earnings 2) Interest Rates and 3) Valuations.

Earnings - For the first time since the 2008 GFC, India has seen 4 consecutive quarters where BSE200 2-year Forward EPS has been upgraded. Sustained momentum in earnings resulting in a cycle of earnings upgrades can help drives markets higher.

Interest Rates - Interest Rates, both in India and globally are trending upwards on account of higher inflation and faster than expected economic recovery. Higher interest rates are generally negative for Valuations.

Valuation - Indian markets have significantly outperformed global markets since the pandemic bottom. The scope for valuation rerating driven market move is limited.

CURRENT STRATEGY

The portfolio is built to monetize the existing infrastructure opportunity in India. Despite the argument of environment being slower, we believe that companies with a dominant market share and growing cash flows would consolidate the opportunity going forward. The focus is on companies with healthy balance sheet which are beneficiaries of ongoing capital formation and will capture a large part of that revenue pool. The current portfolio represents our version of such companies from the Construction & Logistics segments, Industrials space, the Utilities and Energy businesses.
