IDFC Focused Equity Fund is an equity oriented fund investing across the market cap curve. It holds a concentrated portfolio comprising of a mix of core and tactical ideas limited to a maximum of 30 stocks. The core portfolio of the fund primarily invests in businesses that are growth oriented and have superior quality characteristics. The tactical part of the portfolio largely comprises of businesses that have the potential to turnaround driven by change in internal/external environment.

Under the SEBI scheme classification, IDFC Focused Equity Fund is categorized under "Focused" Funds. At an industry level, while these funds are classified as "Focused", their market cap orientation is not defined clearly and by this nature they are also "Multi-Cap".

OUTLOOK

- A focus on macros, especially global will gain more traction going ahead. Currently, the Indian economy's macro is far superior to May-Sept 2013, while facing the "original" taper tantrums.
- Indian equity markets escaping unscathed during such an event does not appear to be a completely realistic thought. Indian markets will get caught in the turmoil of tapering whenever it commences.
- However, India joining an unsavory "club" - remember Fragile Five, appears to have a low possibility.
