

## IDFC INFRASTRUCTURE FUND

An open ended equity scheme investing in Infrastructure sector

A dedicated Infrastructure fund, that invests across the infrastructure value chain with exclusions like Banking, Autos, IT, Pharma and FMCG. It is a diversified portfolio of companies that are participating in and benefitting from the Indian Infrastructure and Infrastructure related activities.

### OUTLOOK

- A focus on macros, especially global will gain more traction going ahead. Currently, the Indian economy's macro is far superior to May-Sept 2013, while facing the "original" taper tantrums.
- Indian equity markets escaping unscathed during such an event does not appear to be a completely realistic thought. Indian markets will get caught in the turmoil of tapering whenever it commences.
- However, India joining an unsavory "club" - remember Fragile Five, appears to have a low possibility.

### CURRENT STRATEGY

The portfolio is built to monetize the existing infrastructure opportunity in India. Despite the argument of environment being slower, we believe that companies with a dominant market share and growing cash flows would consolidate the opportunity going forward. The focus is on companies with healthy balance sheet which are beneficiaries of ongoing capital formation and will capture a large part of that revenue pool. The current portfolio represents our version of such companies from the Construction & Logistics segments, Industrials space, the Utilities and Energy businesses.
