

## IDFC Floating Rate Fund

An Open-ended Debt Scheme predominantly investing in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps/derivatives).

A Scheme with Moderate Interest Rate Risk and Moderate Credit Risk.

IDFC Floating Rate Fund is our offering in the Satellite bucket for a minimum recommended horizon of 6 months.

The fund is proposed under the Satellite Bucket offering which means it will not run a constrained duration or constrained credit risk strategies.

Currently the fund proposes to run a low to short duration risk profile with some allocation to sub AAA strategies.

However, currently the fund aims to maintain a minimum of 70% in AAA/A1+Equivalent/Sovereign/Quasi Sovereign (at the time of investment). Further the fund does not aim to invest in securities rated lower than AA (at the point of investment).

Portfolio has 51.15% exposure to Interest Rate Swaps

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

Potential Risk Class Matrix			
Credit Risk of the scheme →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk of the scheme ↓			
Relatively Low (Class I)			
Moderate (Class II)		B-II	
Relatively High (Class III)			

A Scheme with Moderate Interest Rate Risk and Moderate Credit Risk.
