

IDFC LOW DURATION FUND

An open ended low duration debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 6 months and 12 months. A Scheme with Relatively Low Interest Rate Risk and Relatively Low Credit Risk.

The Fund aims to invest in high quality debt and money market instruments with Macaulay Duration of 6 to 12 months and seeks to generate relatively stable returns with a low risk strategy.

- A high quality portfolio & low average maturity fund for your short term goals
- Ideal to form part of 'Core' Bucket – due to its high quality and low duration profile

LIQUIDITY

For very short term parking of surplus or emergency corpus

CORE

Ideally forms bulk of your allocation-Funds that focus on high credit quality and low to moderate maturity profile

SATELLITE

Funds that can take higher risk-either duration risk or credit risk or both

Indian Railway Finance Corporation	AAA	1.67%

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

Standard Deviation calculated on the basis of 1 year history of monthly data
