

IDFC ARBITRAGE FUND

An open ended scheme investing in arbitrage opportunities

WHAT IS ARBITRAGE?

Buying in one market and selling in another simultaneously to take advantage of a temporary price differential is called arbitrage.

For instance, if you could buy A in Gujarat at ₹100 and sell it in Mumbai simultaneously at ₹101, you could make ₹1 profit at very low risk. This opportunity arises out of market inefficiency and is the basis of every arbitrage trade.

WHAT IS ARBITRAGE FUND?

- The fund invests in arbitrage opportunities in the cash and the derivative segments of the equity markets. It aims to capture the spread (Cost of Carry) between the cash and futures market by simultaneously executing buy (in the cash market) and sell (in the futures market) trades.
- The fund follows a strategy of taking market neutral (equally offsetting because the stocks are bought and sold at the same time) positions in the equity market making it a low risk product irrespective of the movements in equity market.

ADVANTAGE

- **Low risk vis-à-vis Equity Funds:**

As the fund takes market neutral stance (hedges its equity exposure) and doesn't take any directional calls, it is a low risk product versus pure equity funds.

WHO IS THIS FUND FOR?

- Investors with a low to medium risk appetite.
- Investors who want to earn similar to risk-free returns.

PORTFOLIO STANCE

As of 30th September 2022

Currently we are deployed around 66.64% in arbitrage opportunities.

FUND FEATURES: (Data as on 30th September'22)
